

WISE®

Countertop Heated Holding Cabinet (six- section PC door pass through)

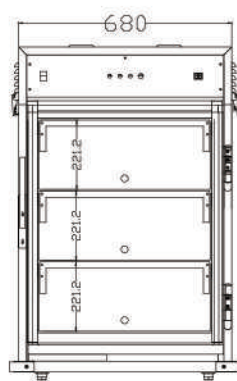

Model ☐ WHTP-1140-6D

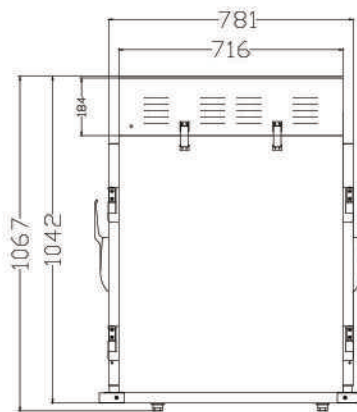

FEATURES

- The principle of forced hot air circulation makes the temperature in the cabinet balanced quickly.
- It can store foods in the high temperature in batches. Enhance the efficiency of food preparation in commercial kitchens.
- With temperature compensation ,keep food fresh during storage.
- Food is stored at high temperatures, which prevents bacteria from growing.
- The front and rear double opening PC door design is more user-friendly, making it convenient for storage and retrieval.
