

WISE®

Holding Cabinet

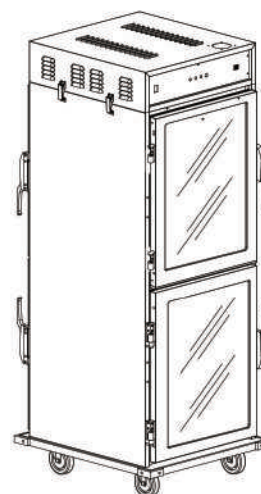

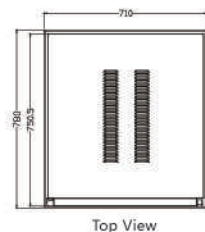

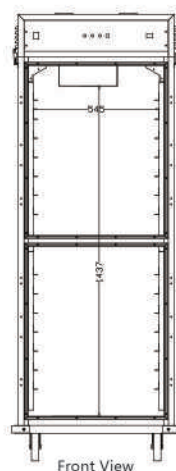

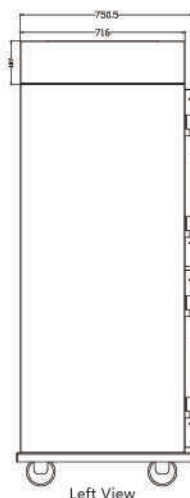

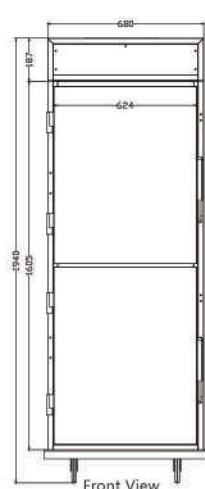

Model ☐ WHTS-1940-2D ☐ WHTS-1940-4D

FEATURES

- Hot air circulation enables heat to be distributed to every corner of the cabinet and maintains good thermal balance.
- It can store foods in the high temperature in batches. Enhance the efficiency of food preparation in commercial kitchens.
- Good maintenance of humidity inside the cabinet keeps food moist and fresh for longer time.
- Maintaining high temperature prevents bacteria growth and keeps food safe to consume to meet the HACCP requirement.
- Depending on usage or location, front open door or pass-through door can be selected for easy food storage.
- Optional casters available.
